ABSTRACT

This study aims to analyze recruitment procedure that is performed by political party and the impact of the procedure to the quality and electability of the members in it. Hence, this study aims to understand and explain the current situation of Indonesia's political parties. In addition, this study also focus on the impact of the political parties to Indonesia's democracy.

This research will be performed in qualitative method with phenomenology approach on the recruitment procedure and electability of Indonesia's political parties. Data had been gathered through observation, in-depth interview, documentation, and FGD (Focus Group Discussion).

The outcome of this research shows that the recruitment procedure in Indonesia's political parties tends to be inclusive. Evaluation of each recruitment and regeneration performed shows that political system and electability degree of every political parties are closely related to the recruitment procedure being done by the particular political parties.

Key Word: Recruitment, Regeneration, Electability and Political Parties
